Experience

Lead Software Developer - *InsideOut Solutions*, 2013 - 2018

Main developer responsible for creating and maintaining dozens of proprietary plugins for WordPress as well as custom themes and child themes.

Developed proprietary tools and web applications for internal company use using WordPress, as well as other technologies like Laravel.

Provided audits and analysis of existing websites over a variety of metrics, mostly focused around load time optimization, efficiency, and cross-platform user experience.

Other responsibilities include providing technical support via phone and email, training, graphic design, and general client support duties.

Worked from a home office as part of a team.

Freelance Services

Website design, creation, management, and hosting of small local-business and personal websites.
